172 St. George
Toronto, Ontario

PROJECT DESCRIPTION

Utilizing a proto-typical 30 screen facility developed by AMC in the United States, Young Wright Gould Evans have developed an overall site plan to harmonize with the surrounding land uses. A pedestrian street forms the focus for this hundred acre development, with a multitude of retail and restaurant establishments.

In addition to entertainment, additional functions include office, sports and industrial projects. Young + Wright Architects Inc. have provided overall site planning and designed with guidelines for the total project.
