Taichung, Taiwan

OWNER

Yue-Mei International Development Corp. Ltd.

DESIGN AND CONSTRUCTION TEAM

Mechanical Consultants: MCW Consultants Ltd.

Electrical Consultants: MCW Consultants Ltd.

PROJECT SCHEDULE

Phase 1 of the development opened in February, 2001.

SCOPE OF SERVICES

MCW Consultants Ltd. were retained to handle master planning of the site services to support the theme park portion of the entertainment precinct.

This entailed establishing all loads on the site for power, water, sanitary, storm etc. and developing a master site distribution system for all services to supply all areas and components of the development.

The loads included such items as kitchens, rides, thematic lighting, general landscape lighting, back of house facilities etc.

In addition to developing site services, MCW Consultants Ltd. developed the designs for HVAC systems for the various buildings on the site.

PROJECT DESCRIPTION

The design team was retained to oversee the design and master planning of a 35 acre theme park as the major component of a large entertainment precinct in the city of Taichung in Taiwan. This precinct will also contain a 350 room hotel, water park and themed retail/entertainment zone, as well as a themed arrival garden which will be the hub for the development. The unique aspect of this project is the international design team including designers from North America, Taiwan and Europe. The theme park is comprised of six theme zones linked together with a back-story that combines an ancient and contemporary history and also ties into the night-time show. The focus of the park will be a contemporary park icon designed to recall aspects of the back-story as well as traditional Chinese architecture.
