

HTTP Error 403.4 - Forbidden

The page you are trying to access is secured with Secure Sockets Layer (SSL).

Most likely causes:

- Secure Sockets Layer (SSL) is enabled for the URL requested.
- The page request was made over HTTP, but the server requires the request from a secure channel that uses HTTPS.

Things you can try:

- Browse to the URL over a secure channel by using the "https:" prefix instead of "http:".
- If the Web site does not have an SSL certificate or should not require HTTPS, disable the setting.
- Verify the SSL Settings in IIS Manager by connecting to the server, site, application or page and opening the SSL Settings feature.
- Verify the configuration/system.webserver/security/access@sslFlags attribute at the server, site, application, or page level.

Detailed Error Information:

Module	IIS Web Core	Requested URL	http://www.mcw.com:80/Projects/pdfnew?id=61
Notification	BeginRequest	Physical Path	C:\inetpub\wwwroot\mcw\Projects\pdfnew
Handler	ExtensionlessUrlHandler-Integrated-4.0	Logon Method	Not yet determined
Error Code	0x80070005	Logon User	Not yet determined

More Information:

This error means that the requested Web page requires SSL. Try to browse to the same URL, but use "https:" instead of "http:".
